
Teachers' professional development system of Singapore

Turekeeva Alfiya

postgraduate Nukus State pedagogical institute

This article deals some contemporary experiences with the Singaporean educational system, especially in teachers' professional development. Furthermore, there are some analysis of national institution and the centralized process of the educational system of Singapore. Moreover, there is described not only the mechanism of choosing the future professionals between the gradutors of HEI, and their scientific expansion, but also the usage of the modern pedagogical and IC technologies at the lessons by teachers
