
Mining Power Management

Rahmatov Baxtiyor

Listener of the Academy of Public Administration under the
President of the Republic of Uzbekistan

This paper makes analyses of the improving of the use of energy resources. As it is considered as one of the factors that contributes to the stability and sustainable development of the economy in all industries. Therefore, it has been investigated both theoretically and methodologically to make it as one of the most energy-intensive industries. To conclude with , qualitative changes in technology, the complication of mining and geological conditions for ore mining, and the introduction of environmental measures were mentioned as the whole.
