Schedule maintenance and repair system of Locomotive

Valiev M.Sh Tashkent state technical university, Tashkent, Uzbekistan
Kosimov H.R Tashkent state technical university, Tashkent, Uzbekistan

To increase the efficiency and reliability of locomotives, it is necessary to constantly monitor the operation process. The introduction of modern automatic control and monitoring systems on locomotives is not only a departure from the established state of the equipment, but also an effective and efficient way of processing measurement information that can detect changes in the technical condition of key parts.
